3. Right-click "AoE2DE_s.exe" and select "Send To" 4. Select "Send to..." from the drop-down menu 5. Click "Browse..." and select "Send to (another folder)" 6. Click "Send" 7. Repeat the previous steps until you have the code in every folder and the game is ready to install. In order to use this way to install the game, every machine should have the version 1.7.0.3 of the video driver. If you do not know how to install the video driver, check the tutorial for the video driver. Instructions for the game's update: 1. Make sure that the game is not running in the Steam application or in the game's bar. 2. In the game's folder, right-click "AoE2DE_s.exe" and select "Send To" 3. Select "Send to..." from the drop-down menu 4. Click "Browse..." and select "Send to (another folder)" 5. Click "Send" If you use the "Send to (another folder)" method, the game will update automatically and you'll not need to do it manually. If you use the "Send to..." method, you'll have to do it manually. Here's a screenshot of a new build of the game. Here's a screenshot of a new build of the game. Here's a screenshot of a new build of the game. Another screenshot of a new build of the game. Q: How to insert in a table without a foreign key in SQLite I am trying to insert a row in a table without a foreign key. If I am already in the table: INSERT INTO [table_name] (position, name, id_employee) VALUES (1, 'paul', 1); If not, I do not have a primary key, this is the error I get: SQLiteException: no such table: [table_name] A: The way to do it is to set the primary key (id) in the INSERT statement. INSERT INTO [table_name] (position, name, id_employee, id) VALUES (1, 'paul', 1, NULL); 82157476af
